

Dream Design of a Word Processor

Andrew Kowalczyk

December 06, 2013

The word processor.

1 Design

The design would mainly use audio recording from the user for all main actions.

One button or key on the computer would denote the act of recording voice for text input. Perhaps

2 Usage Scenarios

3 Rationale

3.1 Priorities

3.2 Mental Models

3.3 Interaction design concepts, guidelines, principles, and theories
